

# T.E.B.U.P.S.

Parts Illustrations/Part Numbers

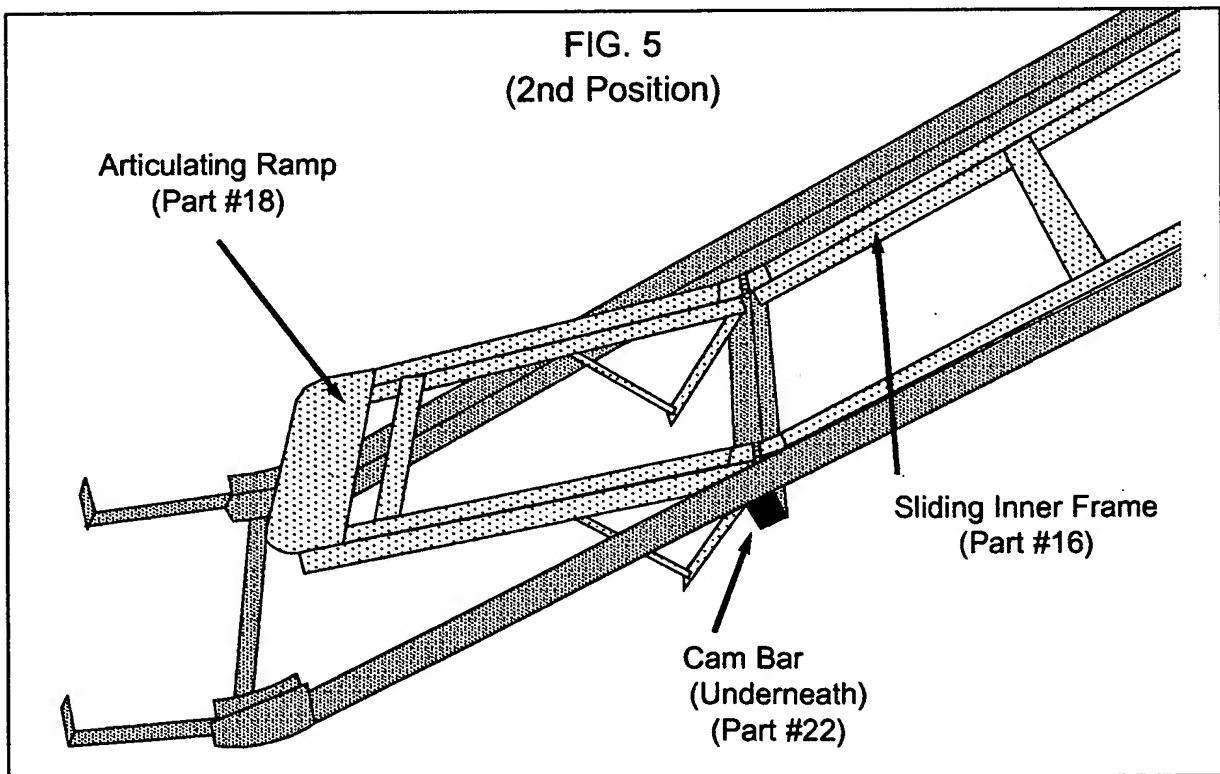

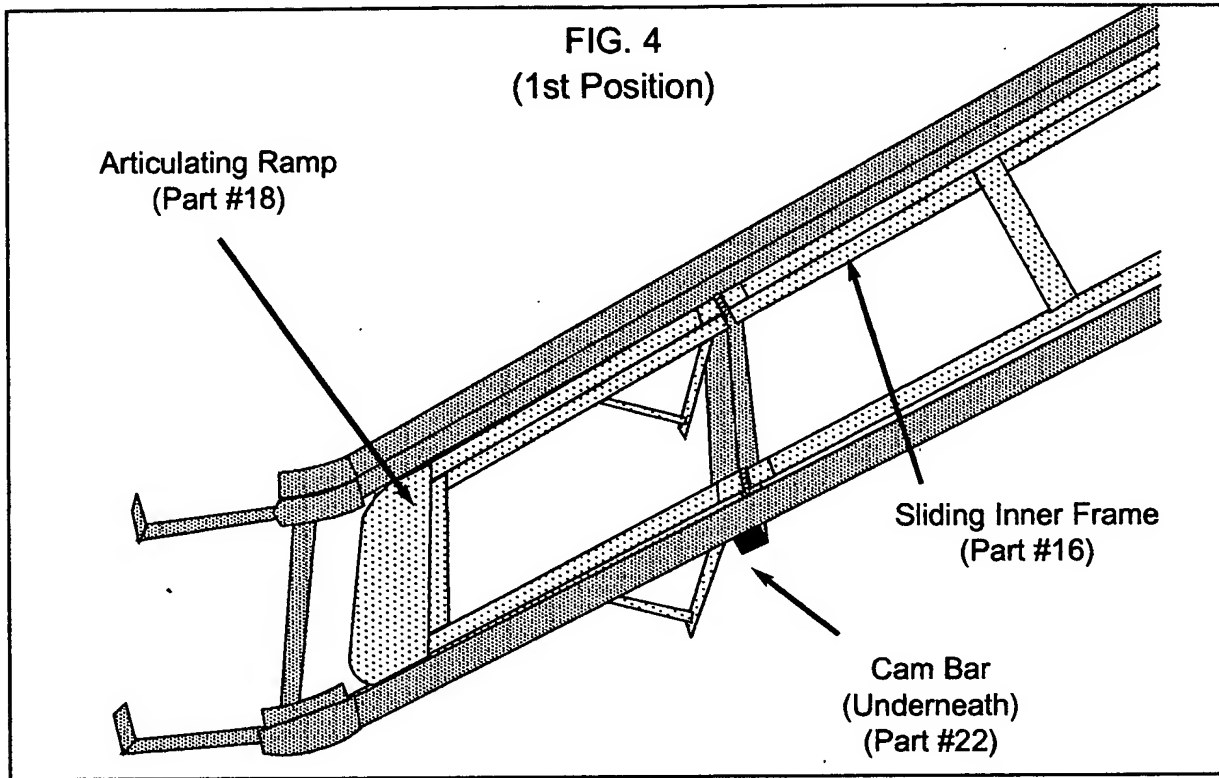

Cases of beverage will be placed on top of the stand and will slide down onto the hand trucks which will be attached at the bottom of the slide portion. The slide portion has an inner frame with an articulating ramp that will raise and lower by use of a control handle located near the top of the slide portion. The articulating ramp will raise to various positions in order to stack cases of beverage on top of each prior case being slid down.
